*Whipper snipper has more power*

To whom it may concern,

About a year ago (~Jan 2020), I treated my 6 ~ 8-year-old McCulloch M1255 CLS (26 cc) 2-stroke chainsaw with the Xcelplus 2-Stroke Treatment. After treatment:

- The idle speed increased (less friction)
- It had more power because it was cutting through the undergrowth better

It is straightforward to treat a 2-stroke motor. All you do is add a small amount of Xcelplus to the petrol.

Yours sincerely

Stan Bielen

P.S. Xcelplus doesn't require regular retreatment. Once is sufficient.
