### **Testimonial: Renewed Energy**

To whom it may concern,

I have owned my silver 2000 Toyota Echo auto 1.3 L 4-cylinder 3 door hatch since 2004/5: It has always been very fuel efficient.

In early 2016 with ~220,000 km on the odometer I added Xcelplus Engine Treatment. The car became more responsive, the engine was noticeably smoother and quieter, and my impression was that it was using less fuel (I didn't have to refill so often)

In January 2018 we added the Xcelplus Top End Treatment (aka 2-Stroke Treatment) to the fuel and again improved the running of the engine.

Xcelplus renews the energy in old cars and it rescues them.

Xcelplus is a great product and I have no hesitation in recommending it to anyone.

Yours sincerely

Peter McDonald
