Xcelplus Fixes Overheating and Starting Problems

To whom it may concern,

My white 1990 Fairmont EA series II with a 3.9 L engine and ~280,000 km has been problematic for all its life:

- It was so hard to start that I had to fit an oversize battery
- It required repeated cranking to start.
- It ran hot
- It ran even hotter when towing a trailer
- It did not like to idle
- It was always at the mechanics and cost me a fortune: They could not tune it

I changed the coil, distributor and leads, but it did not help much.

I put half a bottle of Xcelplus into the car. The oil had been in the engine for ~1,000 Km. I let it run for about 1 minute and turned it off.

After treatment, it started effortlessly: Half a turn to start.

Since treating it, I have had no problems with the engine:

- The motor feels freed
- The temperature is lower
- The engine is less noisy
- It has more power and tows the trailer (~500 Kg 6 x 4') much better

I used to get 340 Km per tank of LPG and now get around 400 Km (+18 %).

Yours sincerely

Patrick Gatt

5/10/2018 Update

I have a Red Ford BA Mk1 2003 with 400,000 km which I have owned for 5 or 6 years. A few years ago, it was getting a bit noisy, so I changed the oil and added some Xcelplus. The engine was noticeably quieter after treatment, and the mileage dropped from 15 L/100 km (6.7 km/L) to 13.6 L/100 km (7.4 km/L). That's an improvement of 10.5 %.

I just bought a White Ford BF 2006 Mk2 with 136,000 km. I changed the oil, and then I decided to try the Xcelplus to see if it works, and it did magic.

My son Gene (an electrical engineer) is a regular passenger in the car, so he knows what it sounds like. He asked me what I had done to the car as you couldn't hear the engine. You would not realise the vehicle was running if you couldn't see the tachometer. The only audible sound was the tyres. I told him I just changed the oil and forgot I had put in the Xcelplus. He insisted I must have done something more because it was running too well. Then I remembered that I had added the Xcelplus.

Now Gene can't wait to put Xcelplus in his car.
